

LOHIT P

React Native Product Engineer | Full-Stack & Platform Engineer

Hyderabad, India | +91 8629924736 | lohicode@gmail.com | lohicode.com | github.com/lohicode

PROFILE

Product engineer with 4+ years shipping production software end to end. Owns the complete lifecycle — product decisions, architecture, implementation, testing, store release, observability and iteration — with React Native/Expo as a deepest strength and full-stack depth across TypeScript, Node.js, Next.js, PostgreSQL and AWS. Led mobile delivery within a lean team for the past year, owning releases and influencing what was built next. Uses AI-assisted workflows daily to accelerate delivery while retaining responsibility for system design, code review, testing, security and production outcomes.

CORE SKILLS

Mobile: React Native, Expo, Expo Router, EAS Build/Submit/Update, offline-first data, native module integration, push notifications, deep links, App Store Connect, Google Play Console, Maestro

Frontend: TypeScript, JavaScript, React, Next.js, Tailwind CSS, TanStack Query, Zustand

Backend & data: Node.js, Hono, Express, Go, PostgreSQL, SQL, Drizzle ORM, Redis/Valkey, Async, Socket.IO, REST APIs, transactions, indexing and data modeling

Cloud & delivery: AWS (ECS, EC2, Lambda, RDS, S3, CloudFront, SES, IAM), Terraform, Docker, GitHub Actions, SST, CI/CD

Quality & operations: Playwright, Vitest, Jest, Maestro, OpenTelemetry, Grafana, Prometheus, Loki, Sentry, PostHog

Foundations: data structures and algorithms, relational databases, concurrency, networking and operating-system fundamentals

EXPERIENCE

Full-Stack & Infrastructure Engineer

Turtil, Hyderabad | Mar 2024 – May 2026

- Owned React Native/Expo delivery for Parentz (formerly Turtil Student; 10K+ downloads) and Turtil Campus (1K+), reaching 11K+ combined Google Play downloads, and led mobile delivery within a lean team — supporting developers, reviewing implementation choices and influencing what we built next.
- Owned the complete iOS and Android release lifecycle: OTA updates via EAS, end-to-end CI/CD, App Store and Play Store submissions, review responses, compliance and production releases.
- Built a native module to keep location collection alive after the React Native process was terminated, buffering locally and syncing to the server on reconnect.
- Designed real-time chat and live poll updates over WebSockets; migrated from a managed platform (Convex) to a self-hosted Socket.IO service to control cost as usage grew.
- Built testing infrastructure across unit, integration and end-to-end (Maestro) layers, backed by reliable backend seed data so releases could be validated automatically.
- Implemented offline timetable access with local SQLite persistence so students and staff could view schedules during unreliable or unavailable network conditions, with considered loading, empty and error states.
- Built full-stack features for a multi-tenant campus-management platform using TypeScript, React/Next.js, Hono, PostgreSQL, Drizzle and Zod; contributed to relational schema design, institution-scoped access controls and workflows spanning academics, finance, HR, library, inventory and learning.
- Engineered CI/CD with change detection, parallel lint, type-check, build and test stages, Playwright E2E testing and diff-coverage gates; used AI for planning, implementation and review while independently validating correctness and production behavior.
- Reduced development-environment infrastructure cost by moving suitable ECS workloads from per-task Fargate capacity to fixed EC2-backed capacity, while retaining autoscaling ECS services for staging and production workloads.
- Operated AWS infrastructure across dev, staging, demo and production with Terraform, ECS, RDS, Lambda, S3 and CloudFront; established OpenTelemetry, Grafana, Prometheus, Loki and alerting for production visibility.
- Built Go services for Redis-backed background jobs and runner orchestration, including retries with exponential backoff, deduplication, scheduled execution, ephemeral EC2 workers and custom operational metrics.

Mobile Application & Backend Engineer

Hyposoft Global Solutions, Hyderabad | Feb 2022 – Dec 2023

- Built and shipped React Native products for cold-storage commerce and sports communities, including booking, inventory, social and real-time notification workflows.
- Implemented Node.js and MongoDB backends, Socket.IO real-time features, Firebase Cloud Messaging and payment flows using Razorpay, PhonePe and Paytm.
- Delivered polished, responsive mobile experiences and collaborated closely on evolving product requirements and design.

Frontend & Mobile Application Engineer (Intern)

Hyposoft Global Solutions, Hyderabad | Dec 2021 – Jan 2022

- Built two published React Native applications — FarmOR Partner (1K+ Google Play downloads) and FarmOR Kisaan — covering B2B purchasing, orders and inventory; also delivered FarmOR's responsive marketing website.

INDEPENDENT ENGINEERING & PRODUCT DEVELOPMENT

Independent Study & Builder

Self-directed, Hyderabad | May 2026 – Present

- Deepening computer-science fundamentals through an implementation-first curriculum covering Go, PostgreSQL/SQL, data structures and algorithms, networking, operating systems, security, deployment and system design.
- Building production-shaped Go HTTP services with pgx, migrations and SQLC while documenting each concept and defending implementation decisions independently.

github.com/lohitcode/computer-science-from-scratch

SELECTED ENGINEERING HIGHLIGHTS

Agentic product experience: Gemini assistant with autonomous tool use, SSE streaming, page context, prompt-injection hardening and PostHog LLM analytics.

Production integrations: Razorpay, PhonePe, Cashfree, Twilio, Firebase, FFmpeg transcoding, S3/CloudFront delivery and WebSocket-based authentication.

Operational ownership: four AWS environments, reusable Terraform modules, deployment automation, autoscaling services, observability dashboards and incident alerts.

EDUCATION

Bachelor of Technology (B.Tech.) | 2017 – 2021

Malla Reddy Institute of Technology & Science, Hyderabad
